

## Liu is at it again...

Posted by [Prof. Goose](#) on June 23, 2005 - 3:44pm

Thanks to [Karlofi](#) for pointing out [this article by HCK Liu](#) in the comments of the Ianqui's post below.

As Karlofi says: "...with this very long article that details the workings of international and domestic monetary issues and can help answer some of the finance related questions. I will caution that without at least econ 101, the article will prove challenging."

That means it's probably worth reading, eh?

(I will do so as soon as I figure out how to get rid of this headache that feels like there's an axe between my eyes. Until then, please feel free to discuss in the comments.)

Also, just in case you were in a hole today...the [market dropped a good bit of value](#) when [oil went over \\$60/bbl](#). Gee, I wonder what'll happen when it hits \$70/bbl.
