Oil suppliers are tightening taps says Jeff Rubin, CIBC World Markets chief economist, because they're using more and more themselves. (Oct 2, CNBC, 5 min, hat tip to [Energy Bulletin](#), [Moral Equivalent of War](#), and [Graphoilology](#)). If you're interested in more from Rubin, check out his slides entitled "OPEC's Call on Itself" [here](#) (pdf warning).

It all sounds like what Jeffrey Brown has been saying regarding his [Export Land Model](#). Good on you Jeff.

T. Boone Pickens shares his outlook on oil. (Sept 19, CNBC, 5 min)

Connect to other peak oil media or comment on these below. Send the link to friends or put it in comment boxes on other sites! (Kenneth Heebner is under the fold, by he way...)
