

## **Cramer's Mad Money (CNBC) Talks "Unconventional Carbons" with the Head of EnCana**

Posted by [Prof. Goose](#) on August 23, 2005 - 3:58pm

Topic: [Supply/Production](#)

6:50 EDT: Cramer leads with skepticism citing the Maass piece with a little contempt. Head of EnCana says "yeah, we have to go to unconventional (more expensive) oil and natural gas." EnCana head talks about growth over time and makes it sound like everything was going to be ok.

This segment will re-air at 9:50p and 12:50a EDT. Not all that interesting...but Cramer did say he expected some good quarters from these companies.
