

## Software upgrade

Posted by [Super G](#) on December 25, 2008 - 3:10am

Topic: [Site news](#)

The site has just been upgraded from Drupal 5 to Drupal 6. For the most part it should behave the same as before, with a few subtle improvements here and there. If you see something strange or broken, it is most likely not by design, so please leave a bug report in this story's comment thread.

For those of you keeping score at home, this is TOD 3.2. Here's the rundown:

### Version Platform Launch date

1.0	<a href="#">Blogger</a>	03/22/2005
2.0	<a href="#">Scoop</a>	08/19/2005
3.0	<a href="#">Drupal 4.7</a>	12/24/2006
3.1	<a href="#">Drupal 5</a>	02/26/2007
3.2	<a href="#">Drupal 6</a>	12/25/2008

Merry Christmas!

**[UPDATE 12/25 1:45p EST]** Not surprisingly, there are a few kinks.

- ~~If you are not logged in, links to the front pages of the TOD:World sites (e.g., <http://europe.theoil drum.com>) go to the main page. Story pages seem from those sites seem to be OK. Fixed 12/25 9:30p EST.~~
- Comment rating has been disabled until I work out some issues with it.
